

DAXHIEL PERUGORRIA RUCIEL

(469) 673-9154 • daxperugorria@gmail.com • daxhielp.github.io

EDUCATION

University of Texas at Austin – Austin, TX

2025 - May 2029

Bachelor of Science in Computer Science

Coursework: Data Structures and Algorithms, Computer Organization and Architecture, Discrete Mathematics, Linear Algebra, Probability and Statistics

WORK EXPERIENCE

Code2College – Remote

June 2026 – Current

Course Instructor

- **Instructed 24+ students** over an 18-session curriculum, achieving 94% average attendance and 95% average quiz scores.
- **Taught SDE fundamentals**, including Python programming, object-oriented design, error handling, and basic data management.

Freelance Development – Austin, TX

January 2026 – May 2026

Fullstack Developer

- **Built a full-stack Next.js 16** (App Router) website for a non-profit environmental campaign using TailwindCSS v4, custom design tokens, and deployed on Vercel.
- **Designed and implemented** a multi-page marketing site with a cohesive brand system, custom typography, CSS animations, and reusable component library.

LEADERSHIP EXPERIENCE

Austin Spanish First – Austin, TX

2020 - Current

Co-Director

- **Direct a 10+ member technical team**, delegating tasks and coordinating efforts to deliver seamless audio/visual experiences for 400+ weekly attendees.
- **Collaborate with cross-functional teams** to provide a satisfactory viewer experience, occasionally handling logistics for meetings and site setup.
- **Redesigned audio and live-streaming infrastructure**, improving broadcast quality and growing online viewership by 50%.

PROJECTS

Recommendation Engine Evaluation Model | *Datahack 2026, ML*

- **Architected a causal Transformer skip-prediction model** for sequential listening behavior by converting each session into a token stream (user attributes + track semantics + context + labels), enabling next-step prediction of the final skip label and reaching 87.07% validation skip accuracy during training.
- **Scaled representation learning to over 1 million tracks** by generating 3-level hierarchical “semantic” track IDs via MiniBatchKMeans clustering (32×32×32) on standardized audio features, then encoding each track with clustered IDs + binned popularity/skip-rate signals to improve generalization on long-tail content.

VibeDungeon | *AI Agent System*

- **Designed and built a modular Python RPG engine** (13K+ LOC) by isolating combat, character, and dungeon systems behind clean interfaces, resulting in a fully playable v1 with zero coupling between scripted game logic and the AI layer.
- **Integrated an LLM-driven agent layer** by introducing provider-agnostic agent abstractions, resulting in AI-generated narrative content pluggable into the engine without touching core logic.

TECHNICAL SKILLS AND WORK STATUS

- **Frameworks & Tools:** Pytorch, FastAPI, Next.js, React, Vercel, Supabase, Express, NEAT, SQL
- **Languages:** Python, Java, Rust, Javascript, C/C++
- **Work Eligibility:** Eligible to work in the U.S. with no restrictions
